

We curate borderless tech teams  
of all levels and tech stacks

We bridge the gap between an in-house and outsourced team.  
Access the best of both worlds.

## WE ARE HIRING

### Mid-Senior Fullstack Engineers (2 Positions)

#### Dedicated project

A South African, forward-thinking technology company dedicated to creating innovative platforms that utilise cutting-edge AI solutions.

#### Location

Remote in Portugal, Ukraine or Azerbaijan

#### Start date

11th of November 2024

#### Work experience

3+ years

#### Type of employment

3-month contract, part-time (totaling 100 hours in December and 160 hours for the remainder of the contract)

## What is Ivy Tech?

Ivy Tech is a London-based company that, since 2018, has been bridging the gap between global clients from the US, Europe, UK and Australia and borderless tech talent. Our vibrant, remote talent community drives innovation and embraces diversity.

#### What we do:

- Provide dedicated full-time work in innovative tech companies for the long term, with Ivy in the middle as your support structure.
- Access to a global network and the opportunity to speak English daily.
- Continuous career development and access to growth opportunities.

#### What we don't do:

- Blocking your career growth by constant project switching or sitting "on the bench".
- Unethical or unfair employment practices.

# We curate borderless tech teams of all levels and tech stacks

We bridge the gap between an in-house and outsourced team.  
Access the best of both worlds.

## What you get with us:

- Our developers are empowered to excel, tailoring their professional paths and influencing the evolving tech landscape.
- They get an opportunity to shape their careers and futures alongside industry leaders.

## Who is our client?

Our client is seeking 2 Mid-Senior Fullstack Engineers to join their expanding engineering team for a specific project working with AI enhanced video and audio creation. You will play a pivotal role in building and shaping innovative, AI-driven platforms, leveraging React on the frontend and Node.js on the backend. This is a fantastic opportunity to contribute to a company that thrives on technical creativity and collaboration.

You'll be part of a small, collaborative team working directly with the Head of Engineering, on impactful projects that integrate AI and machine learning models.

## Who are we looking for?

We are urgently seeking two skilled and innovative Mid-Senior Fullstack Engineers to join our dynamic team, with the ability to start by mid-November, ideally on the 18 of November. The ideal candidates will have a strong background in fullstack development, particularly with expertise in React for the frontend and Node.js for the backend. Familiarity with AI technologies like Hugging Face and Replicate, along with a solid understanding of machine learning models, is essential. You will have the opportunity to work on either an audio generation platform or a content generation platform. A collaborative spirit is crucial, as you will work closely with a small team to deliver cutting-edge, scalable solutions. If you are passionate about driving innovation in AI and thrive in an agile environment, we want to hear from you!

# We curate borderless tech teams of all levels and tech stacks

We bridge the gap between an in-house and outsourced team. Access the best of both worlds.

## Must-Have Skills:

- Proficient in Frontend Development: Strong expertise in React.
- Proficient in Backend Development: Extensive experience with Node.js and JavaScript.
- Database Management: Solid knowledge of PostgreSQL and SQL.
- Containerization: Familiarity with Docker.
- AI Technologies: Experience with tools like Hugging Face and Replicate, along with a basic understanding of machine learning models.
- Agile Methodologies: Experience contributing to Agile workflows (stand-ups, sprint planning, etc.).
- Remote Work Capability: Ability to work autonomously in a remote setting with strong self-management skills.
- While regular client interaction is not required, maintaining professionalism during demos and effective communication is crucial.

## Nice to have skills:

- Cloud Services: Experience with Digital Ocean or similar cloud environments.
- Additional AI Tools: Familiarity with other AI technologies or platforms.
- Fullstack Frameworks: Exposure to additional frameworks or languages that enhance your versatility (e.g., TypeScript).
- Collaboration Tools: Experience with tools like Slack or JIRA for communication and project management.
- Experience in Startups: Previous work experience in a startup environment, particularly in tech-focused companies.

## What We Offer:

- Competitive salary based on experience and skills.
- Fully remote work with flexible hours.
